PROFILE

Web Application Developer and currently **Frontend Lead at THB Hotels**. My approach is based on creating clear, efficient digital solutions focused on user experience, combining design, logic and architecture.

I work as a **full stack developer specialized in Laravel**, integrating UI/UX design, frontend development and backend contributions. I am also expanding my profile into **applied AI, AI APIs, BigData and data analysis** to build smarter, scalable and useful solutions.

FRONTEND

Interfaces, architecture and UX

BACKEND

Laravel, APIs and data

PRODUCT

Design, logic and delivery

EXPERIENCE

Frontend Lead & Full Stack Developer

THB Hotels · Private corporate environment

Present

I develop **internal applications, public websites and corporate solutions**, combining frontend, Laravel and UI/UX design in a collaborative and professional environment, with focus on **visual consistency, maintainability** and user experience.

- **Evolution** of an internal corporate package that unifies components, visual patterns and technical standards.
- **Backend contributions**, API design, optimization, architecture and key implementations.
- **Technical leadership and coordination** in internal modules, code review, progress tracking and stakeholder communication.

Full Stack Freelance

FC Classic Cars & web projects

Present

End-to-end web solutions for real clients, combining requirements gathering, product thinking, UI/UX design, SEO and technical architecture. I work autonomously to turn business needs into clear, fast and conversion-oriented interfaces.

Agricultural Worker

BARDOQUILLAS S.COOP

2023

Fruit picking and sorting during the summer harvest season. **Efficient work under pressure in a team, maintaining quality standards, task organization and daily goals** in a fast-paced environment.

EDUCATION

AI + BigData Specialization

Advanced training

In progress

Training focused on **machine learning, data analysis, AI APIs, LLMs, Python, TensorFlow**, notebooks and Google Colab. I work on model experimentation, data preparation, result evaluation and applying AI to practical web solutions.

Higher Technician in Web Application Development

Escuela Virgen de Guadalupe

2023 - 2025

Complete training in **programming and web development**, with a foundation in frontend, backend, databases, deployment, application architecture and project-oriented methodologies.

I was selected for the **Dual Training Program in collaboration with THB Hotels**, where I worked on real projects and internal standards, leading a team of 4 people.

Honorable Mention in Client-Side Web Development

Dedication and Personal Effort Award

STACK
